C33: King's Gambit Accepted: 3 Nc3 and 3 Bc4

Fraser: 'Myers: This is Game #4 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes.' **1.e4 e5 2.f4 exf4 3.Nc3 d5 4.Nxd5 Qh4+ 5.Ke2 Bd6**

Fraser: 'Myers: This is Game #69 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes.' Estrin/KOMODO/ Helscher: 'Mason-Gambit im Königsgambit. Es entwickelt sich eine interessante Partie, zur Erklärung dieser Eröffnung habe ich die Anmerkungen (Analysen) von Fernschachweltmeister Jakow Estrin verwendet.' **1.e4 e5 2.f4 exf4 3.Nc3 Qh4+ 4.Ke2 Qd8**

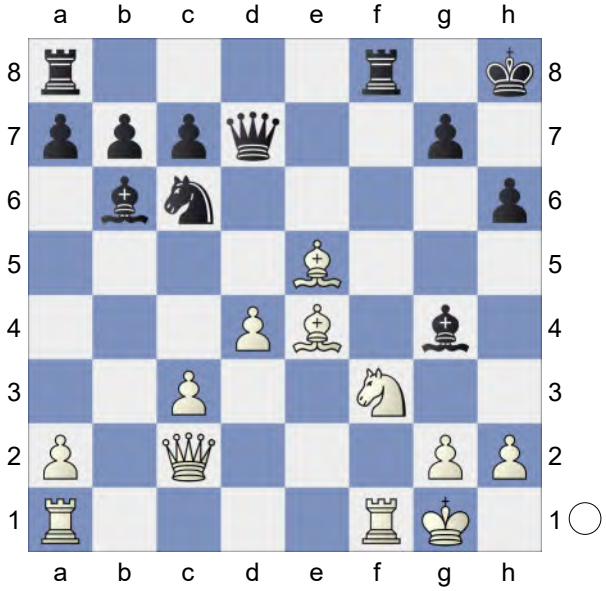
Gut spielbar sind auch die anderen Rückschlagmöglichkeiten. Der Textzug hat den Vorteil, daß er die Rochaderichtung des Nachziehenden vorgibt und ihm das Gegenspiel im Zentrum und auf der g-Linie ermöglicht. **16.Bd3N** Im Unterschied zu dem Gegner, der ja eindeutig lang rochieren will, fühlt sich Weiß zur künstlichen kurzen Rochade gezwungen. Der Nachteil dabei ist, daß der ♖h1 für eine Weile außer Spiel bleibt. **16...Qd5 17.0-0 fxe5** Eine gute Alternative war 17...♗b4, und nach dem Läufertausch hat Schwarz zumindest einen bequemen Ausgleich. **18.Bxe5** Verhindert 18...♘e5 und bereitet g3 und ♔g2 vor. **18...Bg4!** Schwarz öffnet die d-Linie und übernimmt die Initiative. Der Anziehende muß nun äußerst genau spielen, um das Gleichgewicht zu halten. **19.Bh7+ Kh8 20.Be4 Qd7**



21.Bxc6 bxc6 22.Nh4! Ein guter Verteidigungszug! Durch den Angrif auf e5 verhindert Weiß den Aufbau f5,e5, ♗f6. **22...Kg8 23.h3! Rxf1+ 24.Rxf1 Re8 25.Kh2**

12.Rxh4! Qxh4 13.Bf4↑ Wie ist diese Stellung einzuschätzen? Ein wichtiges Kriterium ist die Inbesitznahme von strategisch wichtigen Punkten. Hier sind dies die Punkte d4 bzw. f4. Gerade um von diesen Punkten Besitz zu nehmen opferte der Weiße einen Bauern und sogar die Qualität. Der Besitz strategisch wichtiger Punkte erlaubt es nämlich Initiative zu entfalten.

1.e4 e5 2.f4 Ich freue mich, Joseph in diesem Gedenkturnier zu treffen. Unsere Partien sind immer interessant und lebendig, und es ist keine Ausnahme von der Regel! Mit diesem Gambitzug zeige ich meinen Ehrgeiz, diese Partie zu gewinnen!

2...exf4 3.Nf3 d6 Die Fischer

Verteidigung, deren Ziel ist es, das Eindringen des weißen Springers nach e5 zu verhindern.

4.d4 Weiß besetzet das Zentrum und greift den f4-Bauern an.

4...g5 Schwarz verteidigt seinen Bauern.

5.g3!? Die Variante mit Lc4 brachte mich nicht in Versuchung, und ich fand 5.h4 ineffizient, weshalb ich mich entschied den Textzug zu studieren und zu testen.

[Nach 5.h4 g4 da 6.Se5 nicht mehr möglich ist,muß Weiß Sg1 spielen. Möglich ist auch 6.Ng5?! im Stil der Allgaier-Gambit, dann folgt f6! 7.Bxf4 *(7.Nh3 gxh3 8.Qh5+ Kd7* Ohne Entschädigung für Weiß. *)* 7...fxg5 8.Bxg5 Nf6 und ich sehe keine Kompensation für Weiß.]

[5.Bc4 h6 und folgende Partie brachte mich,wie schon erwähnt nicht in Versuchung Läufer c4 zu spielen. *(5...Bg7 6.0-0 h6 7.c3 Ne7 8.g3 Ng6 9.Ne1 Bh3 10.Ng2 Nd7 11.gxf4 gxf4 12.Bxf4 Nxf4 13.Rxf4 Qg5 14.Bxf7+ Ke7 15.Rf2 Raf8* 0-1 (15) Eberth,Z (2186)-Janosi,E (2130) Lechenicher SchachServer 2010 *)* 6.Nc3 Bg7 7.0-0 Nc6 8.h3 Nf6 9.Re1 0-0 10.a3 Ne7 11.e5 Nh7 12.Bd2 Nf5 13.Qe2 h5 14.Bd3 g4 15.Bxf4 gxf3 16.Qxf3 Qh4 17.Nd5 c6 18.Ne3 Nxe3 19.Qxe3 dxe5 20.dxe5 Re8 21.Rf1 f5 22.Rae1 Be6 23.Be2 Bd5 24.Bd3 Rf8 25.Kh2 Qe7 26.Qe2 Qe8 27.h4 Qg6 28.Qd2 Rae8 29.Re3 Kh8 30.Kg1 Be4 31.Bxe4 fxe4 32.Qb4 Rf7 33.Rxe4 Nf8 34.Rf3 Ne6 35.Rg3 Qf5 0-1 (35) Glazman,M (2555)-Vornanen,A (2353) ICCF 2007]

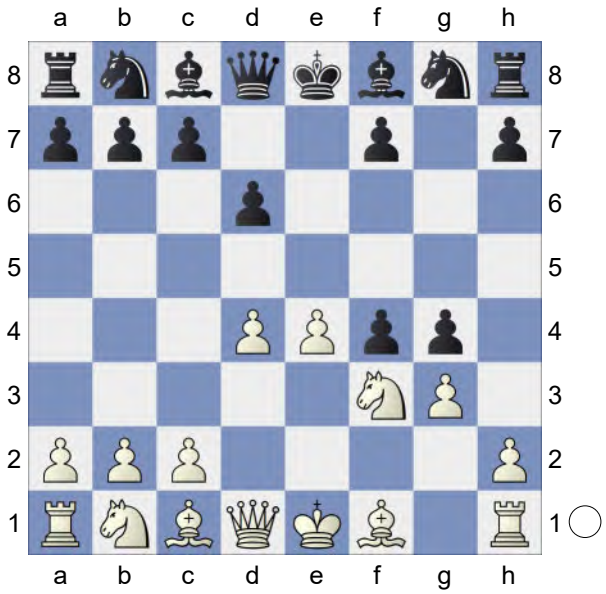
(Diagram)



Vielleicht nicht das beste, obwohl die schwarze Bauernstruktur mit f3 ein wichtiger Faktor für das schwarze Gegenspiel ist.

6.Nh4 f3 Schwarz hat einen Freibauern auf der dritten Reihe, dies ist spielt eine wichtige strategische Rolle.

7.Nc3 Schnelle Entwicklung ist wichtig, meine Idee ist durch Le3, Dd2 und die lange Rochade zu spielen. U.a. soll auch der schwarze Bauer auf g4 unterminiert ,z.B. mit h2-h3 o.ä.

7...Be7 Eine interessante Idee: Schwarz möchte seinen Läufer gegen den weißen springer auf h4 tauschen.

[7...Nc6 8.Be3 Be7 9.Qd2 gefolgt von h2-h3 und lange Rochade.]

8.Be3 Ich folge meinem Plan wie oben erläutert.

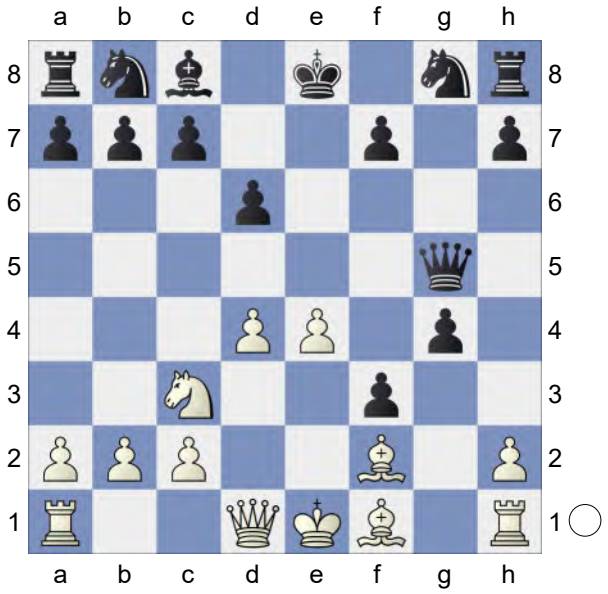
[8.Nf5 scheint auch interessant zu sein, Schwarz ist gezwungen sich vom Läuferpaar zu trennen und weiter mit dem Bauernzug h2-h3, die schwarze Kette der Bauern zu zerstören

Bxf5 *(8...Nf6? 9.Ng7+ Kf8 10.Bh6* avec une belle position blanche*)*

9.exf5 suivi de h2-h3.]

8...Bxh4 9.gxh4 Qxh4+ 10.Bf2 Qg5

[10...Qe7 11.Qd2 h5 12.0-0-0 f6±]



Verhindert die Rochade.Die schwarze Stellung ist solide, aber passiv.

11.h4?! Nach langem Zögern entschied ich mich für diesen riskanten Zug, aber ich will gewinnen!

[11.Nd5 Solider ist, zum Beispiel: Kd8 *(11...Kd7* verhindert die Entwicklung vom Lc8 *)*

A) 12.Be3 Qh4+ 13.Kd2;

B) 12.Bd3 Nc6 Provoziert Dauerschach, denn *(12...Nf6 13.Be3 Qh4+ 14.Bf2 Qg5 15.Nxf6 Qxf6 16.Qd2 Nc6 17.h3 h5 18.0-0-0 g3 19.Bxg3±* und weiß hat deutlichen Vorteil.*)* 13.Be3 Qh4+ 14.Bf2 Qg5 15.Be3 Qh4+;

C) 12.Qd3 Besser war Le3 gefolgt von der langen Rochade]

[11.h3? g3-+ und Schwarz gewinnt]

[11.Qd2 ist überhaupt nicht nach meinem Geschmack, zum Beispiel: Qxd2+ 12.Kxd2 h5 13.Nd5 Kd8 14.h3 Nc6 15.hxg4 Bxg4 16.Bh3 Nh6 17.Nf6 Ke7 18.Nd5+ Kd7 19.Nf6+ Ke7!=]

11...Qh6 12.Nd5 Zentralisierter Springer! In diesem Abschnitt der Partie muß ich die Initiative halten,viel Druck auf Joseph ausüben und gegen seine statistichen Vorteil kämpfen,bzw. zu stoppen! Mein Vorteil ist das dynamische Spiel. Wenn Schwarz passiv spielt,bekomme ich gute Chancen! Die Bedrohung ist nicht unbedingt den schwarzen Bauern auf c7 zu schlagen, sondern eventuell c2-c4 zu spielen.

[12.Qd3 Ne7 13.Be3 Qg7 14.0-0-0 g3 15.Rg1 g2 est à l'avantage des noirs ! Cette variante montre l'importance stratégique de cette chaîne de pions (avantage statique).]

12...Kd8 13.Be3 Qg7

[13...Qe6 war eine weitere Möglichkeit für Schwarz, vielleicht auch etwas bedrohlicher als der Textzug.

14.Bd3 Nc6 *(14...c6* um den Springer zu vertreiben.*)* 15.Qd2 Bd7 *(15...g3 16.0-0-0 f2 17.Rhf1 Nge7 18.Bg5 h6 19.Bf6* Meine Figuren sind gut platziert.*)* 16.0-0-0 g3 17.Rhf1 f2 18.Bg5+ *(18.Bxf2 gxf2 19.Rxf2-+)* 18...f6 19.Nxf6 Nxf6 20.d5 Qe5 21.dxc6 Bxc6 22.Bf4 Nxe4 23.Bxe4 Qxe4 24.Bxg3 Kd7 25.Bxd6 cxd6 26.Qxd6+=]

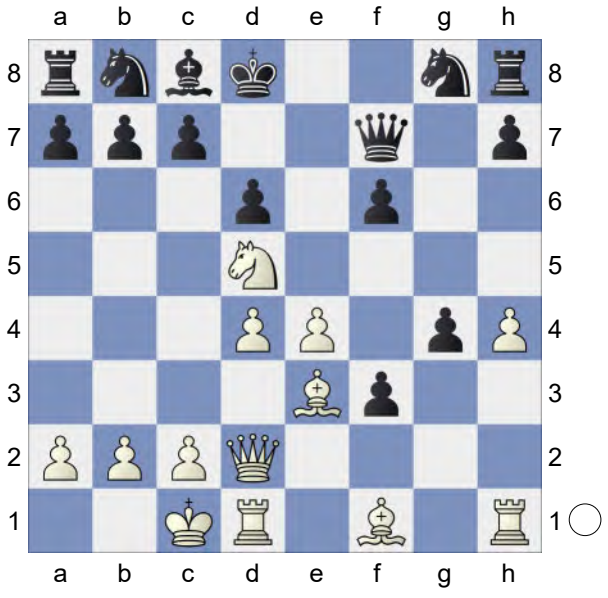
14.Qd2 verhindert ...-c6 wegen Da5+

14...f6? Verhindert kein späteres e4-e5, Weiß öffnett die Linien auf den König, der immer noch in der Mitte steht.

[Auf 14...g3 folgt 15.0-0-0 g2 16.Rg1]

[14...Be6 die beste Antwort, aufgrund der zwei Mehrbauern ist Schwarz bestrebt zu tauschen. Ich hingegen möchte den Tausch vermeiden! Es

könnte folgen
15.Nf4 h5 16.0-0-0∞]
15.0-0-0 Den König vor Angriffen so schnell wie möglich in Sicherheit bringen.
15...Qf7?!
[15...Ne7!? 16.Nf4 Ich muß meinen Springer auf ein anderes Feld setzen. *(16.Bc4 Nxd5 17.Bxd5* habe ich zwar das Läuferpaar, aber mir fehlen Angriffspunkte.*; 16.Bh6 Qf7 17.Nxe7 Kxe7 18.e5* um Linien auf den König zu öffnen, aber meine Läufer sind nicht gut entwickelt *)* 16...Nbc6 Schwarz entwickelt sich 17.Bc4 h5 18.Rhg1 Ng6 19.e5 fxe5 20.Nxg6 Qxg6 21.Bg5+ Kd7 *(21...Ke8? 22.dxe5±)* 22.Bb5 Die schwarzen Bauern am Königsflügel entscheiden über das Schicksal des Spiels.]
[15...Nc6 16.e5 *(16.Bc4)* 16...Bf5∞ *(16...Bd7!?∓)*]



Noch eine Ungenauigkeit. In der Tat, Joseph spielt wieder seine Dame. In Königs-Gambit, sind Tempi Entwicklungen extrem wichtig und der Verlust eines jeden erlaubt dem Gegner Angriffsmöglichkeiten.
16.Bf4 Be6 Um den zentralen Springer zu vertreiben und sich weiter zu entwickeln.
17.Ne3 Wenn beide Seiten Material geopfert haben, sollte man es wie die Pest vermeiden Figuren zu tauschen, sondern man sollte sie für den Angriff halten. In diesem Fall greift der Springer den Bauern g4 an und es droht e4 e5- mit Durchbruch im Zentrum.

Joseph gibt sportlich fair auf! Eine Partie, die viel Energie gekostet hat, aber es war Genuss pur. Das KG erlaubt viele Möglichkeiten für Weiß ,aber es kostet viel Mühe die Initiative in einen Vorteil umzumünzen. Natürlich kann Schwarz sich gut verteidigen und hat ebenfalls gute Chancen. Also zögern Sie nicht, König Gambit zu spielen,sie werden es nicht bereuen!

C30: King's Gambit Declined

1.e4 e5 2.f4 Bronstein is a great believer in sacrificing pawns against computers: "it throws out all their assessments," he once told me. It's certainly a refreshingly different

approach to the standard strategy of blocking it up and then outsmarting the machine with long-term planning. **2...Nf6** **3.fxe5** This is the most popular move for White, but it is not the only one. **3...Nxe4** And this in turn is Black's main reply, speeding up his development and stopping White from developing a pawn centre. The problem is that his queen comes out quite early, and this allows White to gain time by attacking it. **4.Nf3** **Ng5**

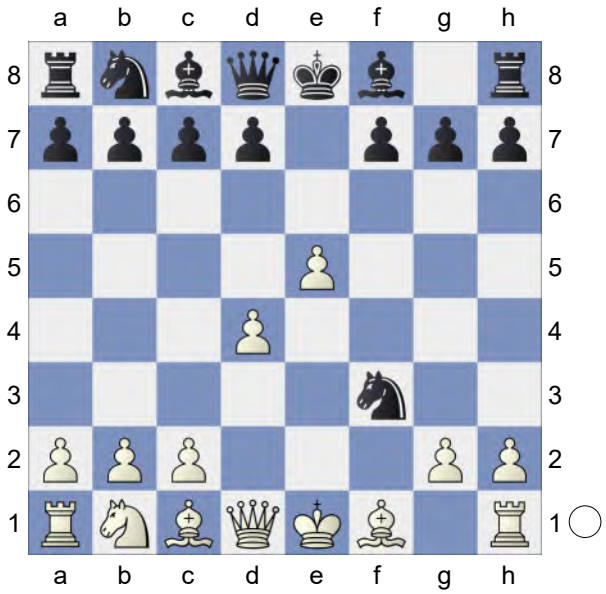
[4...d6 ; for example, 5.d3 Nc5 6.d4 Ne4 7.Bd3 d5 8.0-0 Be7 9.c4 c6 with many threats against Black's wandering monarch. 10.Nc3 Nxc3 11.bxc3 is also interesting, though less dramaticthe immediate 11...0-0 12.Qe2]

[4...d5 5.d3 Nc5 6.d4

A) 6...Ne4 7.Bd3 Be7 *(7...c5)* 8.0-0 0-0 9.c4 Be6 threatening 19 Bc3 Both 10.Qc2 and 10...c6 are well met by 11.Nc3 . After White has played d2-d4 this thrust by Black is less effective because it leaves White with a protected passed d-pawn. Nxc3 looks very interesting; for example, 12.Bxh7+;

B) 6...Ne6 7.c4 isn't enough for White *(White might also consider 7.Be3 , for example c5)* 7...c6 8.Nc3 Be7 9.Be3 looks even worse for Black than on the last move. It's very risky to capture on g2: 9...0-0 10.Qd2 b6 11.Bd3 Na6 12.cxd5 cxd5 13.Rd1 f5 14.exf6 Rxf6 15.0-0 Nac7 16.Ne5 and White has more than enough for his pawn because of his play on the dark squares.]

5.d4 **Nxf3+**

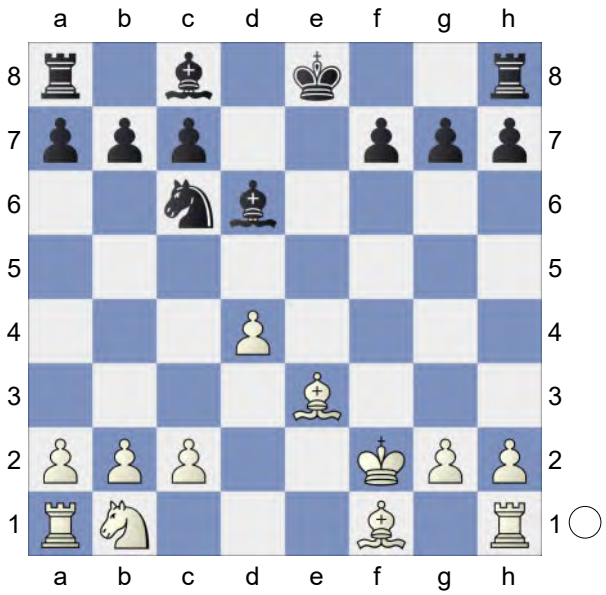


6.Qxf3 **Qh4+** **7.Qf2** Still the 'main line', as much as there is a main line in the Wing Gambit! **7...Qxf2+** This may be the best as on this diagonal Black's bishop covers the crucial d6 and c7 squares, not to mention the vulnerable e5-pawn. But it's not the only square to which the bishop can be retreated: **8.Kxf2** The humanoid choice, supporting Bc4 next move and preparing to bring the knight to c4 or b5 later. The position is equal. **8...Nc6** Making room for the d6-bishop to retreat to b8 if necessary. **9.Be3** Despite Bronstein's patronage I'm not convinced this is best.

[9.c3 d6 10.exd6 with a draw in the offing. if 10...Bxd6? then 11.Nd2 wins on the spotAnd not 11...Be6 because of *(Or 11...Bf5 12.Nc4 Be7 13.d5 Bc5+ 14.Be3* with a continued initiative for White. Black's pawn is meaningless unless he gets to advance it. *Bxe3+!?* is another possibility, also giving White strong pressure for the pawn. After *15.Nxe3* White can try *Ne7 16.Nxf5)* 12.Ne4 Be7 13.Ng5 etc. After 13...Bxg5 White can keep up the pressure with

14.Bxg5 , but this might have been better for Black than the game. Now White gets his pawn back and keeps the initiative.]

9...d6 10.exd6 Bxd6



This looks like the best as now White has to watch out for ...e4 by Black in conjunction with snatching the g2-pawn. See Haub-Lukov for alternatives. **11.Nc3** -0.46/19

C34: King's Gambit Accepted: 3 Nf3: 3... Nf6 and 3...d6

I think we've seen the heyday of the King's Gambit. Before the advent of strong computers, it was less of a risk to enter objectively dubious positions. These days White's playable options have shrunk dramatically. At the elite level, it's reserved for speed chess or extremely occasional one-off surprises. Ian Nepomniachtchi did a brave attempt in his Long Live the King's Gambit, but he had to acknowledge that White was worse against our proposed path. Both Ian and John Shaw in his The King's Gambit bible, struggled against Fischer's Defense. The main line appears to be very promising for Black, and so they both went for earlier deviations. Ian analyzed the line beginning4.Bc4h6!5.h4Nf6deeply, but was forced to acknowledge White was groveling in an unpleasant middlegame. John instead proposed4.d4g55.g3Bg7!6. Nc3, a line Ian actually played himself recently. But if we know our stuff White is only fighting to survive. White's other main attempt is3.Bc4, the so-called Bishop's Gambit. This has been under a theoretical cloud for years, and John Shaw went as far as describing it as refuted.In practice, I think we're likely to reach a very similar position against both of the main moves. White will take possession of the center, while we cling on doggedly to our extra pawn with ...g7-g5. Our setup with the bishop on g7, knight on c6, and pawns on h6, g5, f4, and d6 is extremely hard to break. We safely secure the f4-pawn, meaning not just that we have a material advantage, but that White finds it very difficult to generate any play of their own. The bishop on c1 struggles to enter the game, and White's impressive-looking center

ends up just being a weakness. We wrapped up the chapter looking at White's remaining third move attempts. The only question there is whether they lose by force. I don't think we need to memorize too much. In general either ... Qh4+ or slicing open White's king with ... d7-d5 work well. **1.e4 e5 2.f4 exf4 3.Nf3 d6 4.d4 g5 5.h4 g4**

[Fraser]

Myers: This is Game #113 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player

and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.f4 exf4 3.Bc4 Qh4+ 4.Kf1 g5 5.Nf3 Qh5**

Myers: This is Game #41 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. Mr Mo's game G4.48: "Looking for Romance!?" Don't be startled by the above title! I'm simply inviting you to enjoy seeing a couple of beautiful encounters involving stunning sacrifices by the late great Karl Ernst Adolf Anderssen (1818-79), who stars throughout "The Old Romantics": the title of the first chapter in David Le Moir's excellent new 240-page Gambit book, "How To Become A Deadly Chess Tactician". One might not expect much excitement from a German professor of mathematics, but in his native city of Breslau, Anderssen produced some of the most attractive games of chess that have ever been published. That includes the following dynamic duo of ultra-attacking wins against a certain Jacob Rosanes in 1862-1863. Mr Mo's game G4.48: "Looking for Romance!?" Don't be startled by the above title! Conventional wisdom at the time assumed that White had an obligation to fight for the initiative at any price. That is why material sacrifice at an early stage of the game was simply a show of good taste, and to decline the opponent's kind material offer was not considered an honourable option. Natuerlich war dies die gebraeuchlichste Eroeffnung um die Mitte des 19. Jahrhunderts. Der Zeitgeist verlangte es damals, dass Weiss mit allen Mitteln um die Initiative zu kaempfen hatte. Daher waren Opfer bereits im Anfangsstadium einer Partie einfach Zeichen des guten Geschmacks, und eine Ablehnung solch freundlicher Angebote galt nicht gerade als ehrenhaft. Myers: The databases seem to have settled on the game-data as given here, agreeing with information published by TD Harding and others, but we should note that this does not correspond with what is written in Alekhine's "My Best Games of Chess". Alekhine writes in the English version of that book that this game is "played by correspondence in Russia, 1908-1909" and the black player is given as "W. de Jonkovski". According to Harding, "V Zhukovsky" is correct. Victor Charushin identifies Zhukovsky as a diplomat, serving as the Russian vice-consul in Adrianople, Turkey. Perhaps someone can discover a first name from non-chess sources, to complete our record. **1.e4** Myers Alekhine **1...e5 2.f4 exf4 3.Nf3 g5 4.h4 g4 5.Ne5 Nf6**

41.gxh4 Kh6 42.Kh1 f4 Schwarz hat verbundene Freibauern und die Schwerfiguren sind von der Verteidigung des e-Bauern entbunden. Andererseits bleiben die weißen Remisaussichten wegen des relativ ungeschützten schwarzen Königs intakt. **43.c3 Qf5 44.Rg2** Vidmar: "Die Stellung verdient ein Diagramm. Wer sich nur halbwegs in sie verteift, muß zur Feststellung gelangen, daß Schwarz eine vollkommen 'gewonnene' Partie hat, er wird gewiß, wenn er dem vorangegangenen Spielverlauf aufmerksam gefolgt ist, auch zugeben müssen, daß Schwarz den Sieg verdient hat."
Leider ist Verdienst eine sehr subjektive Größe. Einige Stellungsfaktoren sprechen eben dafür, daß Weiß durchaus gute Remischancen besitzt. Vor allem ist es natürlich der schwarze König, der Weiß Hoffnungen auf Dauerschach offeriert. Schwarz steht besser; ein Gewinn ist kaum nachweisbar. **44...Re6?!** Von Vidmar mit zwei Fragezeichen versehen. Er zitiert Tarrasch aus dem Turnierbuch, der einen "leicht zu findenden Weg zum Gewinn" angibt:

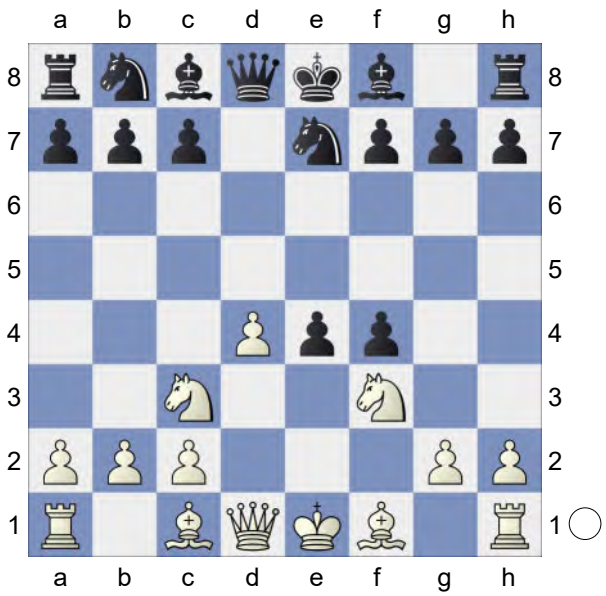
Once more, we now return to Montpellier and the Candidates' tournament in France, where I previously faced Vassily Smyslov and Mikhail Tal. Of all our contests together, this game was the most painful and left me the most sore at Boris. The story goes like this: we were scheduled to play in round nine of the tournament. My seconds Ulf Andersson and Miguel Quinteros and I rented a home outside of the city, and we would all drive into town together and to the playing hall. We arrived at the playing hall at our normal time well before the start of the game, I went to my table and filled out my scoresheet, waiting for Boris and the game to begin. The Arbiter came to tell me that Boris had an earache. That to accommodate Boris, he, the arbiter, had rescheduled the game for tomorrow's free day. That was it, just like that. Well clearly, this was more than annoying for me. I had made plans for the free day, and if I had known there would be no game for me that day I would have stayed home. Now I made a dreadful mistake. I stayed to watch the round. Lourdes, Ulf Anderson's wife, begged me to go back home and to "enjoy the free day." She knew something that I did not. I failed to follow her sage advice. By the time we returned, all the game-watching and analyzing left me with the impression that I had played the round. The next day we went to the playing hall. The whole place was empty, no players, no spectators – just a few arbiters, Boris and me. It was a very strange feeling. I couldn't shake the concept that somehow we were "playing outside of the event," and that the game became disconnected from the "real tournament." Boris seemed absolutely fine. The earache had passed. Now we move to a completely different aspect of the

story: the rules. Simply put, in those days the rules allowed the players and arbiters to move the schedule of play easily. So, to be clear, Boris was well within the rules to request a free day because of his illness. On the other hand, there are rules and there is the spirit of play. I was clearly negatively affected by the changed schedule. My opinion was not sought, and nor was my consent given. Boris knew in advance that the game was rescheduled; I did not. Today, such timeouts cannot be made. Either you play at the scheduled time or you forfeit. The player simply has to follow the schedule of play. I like the rules of today. I've played with splitting headaches, an upset tummy and dreadful jet-lag, but have never requested a timeout or rescheduled a game.

C34: King's Gambit Accepted: 3 Nf3: 3... Nf6 and 3...d6

1.e4 e5 I had started to take up the Petroff Defense and really liked the positions I was obtaining. Boris now began rolling his head back and forth from left to right, and made hand movements as if tossing an imaginary coin into the air, catching it and flipping it over to see what he would play. **2.f4** The King's Gambit. Talk about catching me flat-footed. Of course, I knew that Boris did, on occasion, play the King's Gambit, but somehow I had put it out of my mind and out of the realm of possibility. I began to think and think. Could I play something a little offbeat and perhaps catch Boris in his own specialty? **2...exf4 3.Nf3 Ne7** A combination of over-the-board inspiration and poor home analysis. I was trying to think about the main lines and a blitz session I'd had with Robert Byrne. He too liked playing the King's Gambit as White, and I had come off pretty well in those games. So, why didn't I play my "main" preparation? Well, a thought intruded while I mused over what to play. There was a player, Jacob Yuchtman, a defector from the Soviet Union, who I used to play blitz against when visiting New York City. He had recommended the text and we had analyzed it together superficially, and somehow right now it seemed to fit the bill for taking the game off the beaten track. I hoped to catch Boris off guard. 3...g5 4.h4 g4 5.Ne5 5...d6 much attention had also focused on 5...Qe7 6. d4 d6 6.Nxg4 Nf6 returning the pawn for "comfortable development." My preparation, in case anyone would play the King's Gambit against me, continued 7.Nxf6+ 7.Nf2 Rg8 8.d4 Bh6 looks fine for Black. Qxf6 8.Nc3 Nc6 9.Nd5 9...Qg6 10.Qf3 Nd4 11.Nxc7+ 11... Kd8 12.Qc3 12...Qg3+ 13.Qxg3 fxg3 14.Nxa8 Nxc2+ 15.Kd1 Nxa1 with a typically scrappy kind of position that I more or less analyzed out to a draw. **4.d4 d5 5.Nc3 dxe4**

(Diagram)



6.Nxe4 Ng6 And this is the very big deal. Black simply defends "his" f4-pawn and challenges White to show compensation. Of course, Black must not be allowed ... Bf8- e7 and ...O-O, when he simply stands much better, if not close to winning. White has to strike quickly and hard, disrupting Black's scheme of development, or else he will be worse. In passing, 6...Nd5 is reasonable for Black and is the best move. **7.h4** Without this move, White stands worse. My problem was that I didn't think White could play the text. **7...Qe7N** 0.66/19 Simply put, I wrongly thought that White's play was now refuted. 7...Bf5 8.Bd3 8.Qe2 Bb4+ 9.c3 O-O is fine for black! Be7 9.h5 Nh4 with a roughly even game. I hardly gave this line consideration.

8.Kf2± A real zinger. A powerful move that totally rocked my boat. As in our game in Zurich, my play was supposed to bring me an expected victory CC StartBracket CC ...Bg7xe5 and ... Qe7-b4 CC EndBracket CC that simply wasn't there. My analysis had simply stopped at 8.Qe2, and I never considered anything else, let alone the text. The move refutes my set-up. After the "forced" 8.Qe2 h5 Black can be confident about the rest of the game. I would complete my development by ... Bc8-g4, ...Nb8-c6 and ...O-O-O, while holding on to the f4-pawn. And my game literally plays itself. And now h4-h5! would win. **8...Bg4** 1.27/19 It was stunning how severely I had wrong-footed my own pieces. My queen on the e7-square is clearly misplaced, interfering with the development of my f8-bishop, which in turn, keeps my king in the center... Of course, White wants to play h4-h5, drive away the g6-knight, and capture the f4-pawn with wonderfully harmonious development. I can't play 8...h5 9.Neg5 which gives up the g5-square. Indeed, after 9.Neg5 I'm sunk. White is ready for 10.Bd3 and 11.Re1, not to mention 10.Bc4, when I hate my position. In my view, things are now so bad I should probably have sacrificed my queen with 8...Qxe4 9. Bb5+ 9...c6 10.Re1 Qe7 11.Rxe7+ Bxe7 12.Bd3 Bg4 13.Qe1 Bxf3 14. Myers: This is Game #91 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.f4 exf4 3.Nc3 Qh4+ 4.Ke2 g5 5.Nf3 Qh5**

Myers: According to Charushin, this was the first correspondence event in which "Tisha" Alekhine competed independently and without assistance from his older brother, Alexei. It was a "gambit" event in which all games were

required to open with the Kings Gambit, Evans Gambit, or Vienna Gambit. The event was troubled by a number of dropouts from the original cast of 10 players, but it was finally completed at the end of 1906 with Alekhine in first place with a score of 11/14. **1.e4** Myers Russell Dyckhoff **1...e5 2.f4 exf4 3.Bc4 d5 4.Bxd5 Qh4+ 5.Kf1 g5**

Myers: This is Game #64 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.f4 Bc5 3.Nf3 d6 4.c3 Bg4 5.d4 exd4**

Myers: This is Game #92 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.f4 exf4 3.Nc3**

Myers: This is Game #103 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow

are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** GB Fraser #103 GB Fraser #103 Myers Fraser **1...e5 2.f4 exf4 3.Nc3**

Nc6 Black transposes into the Hampe-Allgaier Gambit, which in fact has been quite heavily analysed by people like Chigorin, Glaskov and Estrin. Unfortunately for them they were not using computers, so there are quite a few moves here which haven't covered very thoroughly.'' **1.e4 e5 2.f4 exf4 3.Nf3**

[For reasons I will state further below, the King's Bishop's Gambit with 3.Bc4

has become increasingly popular in recent years, and while a detailed coverage is beyond the scope of this book, Carl Friedrich Jaenisch's observation that it is 'an imperishable monument to human wisdom' is quite noteworthy.]

3...g5

[Naturally this classical approach, by which Black seeks to defend the gambit pawn, is also the most critical response. As a historical aside, it is quite interesting that the idea of initiating a counterattack is not as modern as one might think. For example, the so-called Modern Defence with 3...d5 is actually quite old: analysis about this line was published by Hirsch Silberschmidt in his book 'Das Gambit oder Angriff und Vertheidigung gegen Gembitzüge' in 1829.]

4.h4 With this move, White seeks to demonstrate that the defence of the gambit pawn by 3...g5 has weakened Black's kingside pawn formation.

[The main alternative 4.Bc4 , invites Black to play 4...g4 *(4...Bg7* leading to either the Philidor Gambit (after 5 h4) or the Hanstein Gambit (after 5 0-0), is a more practical choice. Without going into further detail, it is safe to say that Black is able to equalize in both lines*)* , after which there are various wild gambit lines to choose from: 5.Ne5 *(5.Nc3* (the McDonnell Gambit)*,; 5.0-0* (the Muzio Gambit)*,;* and even *5.Bxf7+ Kxf7 6.0-0* (the Wild Muzio Gambit)*)* 5...Qh4+ 6.Kf1 (the Salvio Gambit). While most of these gambits are rather dubious from a theoretical standpoint, they are also highly complicated and require precise preparation on the part of the second player.]

4...g4 5.Ne5N We have now reached the initial position of the Kieseritzky Gambit. Its origins stem from Polerio and it was, among other variations, analysed further and more deeply by Salvio and Philidor. There are also a few interesting facts to mention.

[First of all, it is widely known that 5.Ng5 is the Allgaier Gambit, named after Johann Baptist Allgaier who first published extensive analysis about this line in 1819 in his 'Neue theoretisch-praktische Anweisung zum Schachspiele'. Interestingly enough, from then on both 5 Ng5 and 5 Ne5 were classified under the Allgaier designation, and only Kieseritzky's efforts to popularize 5 Ne5 in the 1840s eventually led to a separation. However, neither the 'Chess Player's Chronicle', a leading chess periodical from that period, nor the biography of Kieseritzky, 'Zagadka Kieseritzky' ego', were of any help in determining if Kieseritzky himself published any analysis on 5 Ne5. h6 6.Nxf7 Kxf7 7.Nc3 Nc6 8.d4 d5 9.Bxf4 Bb4 *(9...Nf6 10.Nxd5 Bd6 11.Bc4 Be6 12.0-0 Bxd5 13.exd5 Ne7 14.Be5 Neg8 15.Qxg4 h5 16.Qe6+ Kg7 17.Rf5 Rh6 18.Rg5+ Kh8 19.Rf1 Bxe5 20.dxe5 Ng4 21.Qf7 Rh7 22.Rxh5 N8h6 23.Qf4 Qe8 24.Qg5* 1-0 (30) Feelders,A (2415)-Hracek,Z (2255) 2nd Morzine Festival (open) 2015 *Qxh5 25.Qxh5 Ne3 26.Bd3 Nhf5 27.Qg5 Rg7 28.Qf6 Nxf1 29.Bxf5 Ng3 30.Qh6+* 1-0 Down,N-Furmston,M ENG-chT corr 1993*)*

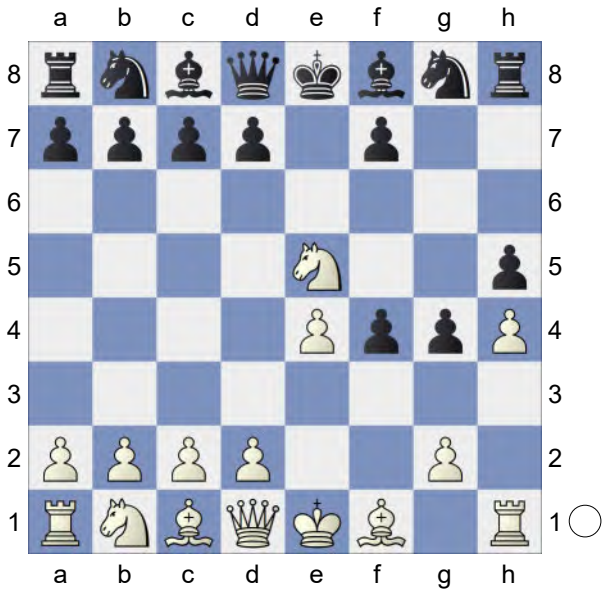
5...h5

[The Berlin Defence (5...Nf6) which, along with the Fischer Defence (see Chapter 32), is supposed to be Black's most reliable defence, will be discussed further below.]



This move, which characterizes the so-called Long Whip Variation, was considered to be the best defence for most of the first half of the 19th Century.

6.Bc4

[6.d4?! is too slow. Then Qf6 7.Bc4 Nh6 8.c3 Bd6 9.Nd3 f3 10.Bg5 *(*both *10.e5? fxg2;* and *10.gxf3 Bg3+* followed by 11...Bxh4 are equally bad *)* 10...fxg2 11.Rg1 Bg3+ 12.Kd2 Qf3 leads to a winning position for Black, as already given by Walker in 1832.]

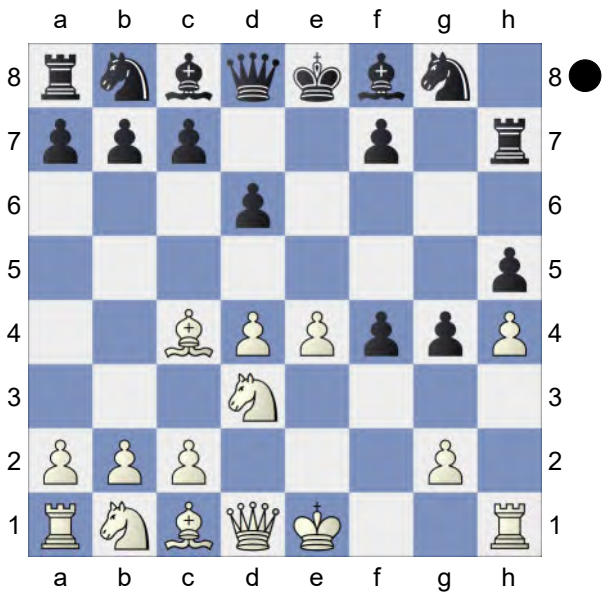
6...Rh7

[6...Nh6 is the other move to protect f7. After 7.d4 d6 8.Nd3 Staunton analysed f3 9.gxf3 Be7 10.Be3 Bxh4+ 11.Kd2 gxf3 12.Qxf3 Bg4 13.Qf4 , assessing the position with 'White has the freer game but Black keeps the pawn'.]

7.d4 d6 8.Nd3

[After consulting many sources on the King's Gambit, it seems that after 8.Nxf7 Rxf7 9.Bxf7+ Kxf7 10.Bxf4 theory's opinion of White's attacking chances is generally quite positive. In slight contrast to both Joe Gallagher and Paul Keres ('White gets a monstrous attack'), Korchnoi and Zak in their King's Gambit adopt a more modest tone considering White's attack 'difficult to meet'. Yet it should be noted that after Bh6 it is Black who has an overwhelming score from the games given in the 'Mega Database 2008': one prominent example being A.Anderssen-L. Kieseritzky, 8th matchgame, London 1851 (which Black won). More to the point seems to be Bangiev's assessment, namely that the position after 11.0-0 Kg7 is simply unclear.]

(Diagram)



8...f3! **9.gxf3** Should Black want to prevent a sacrifice on f7, this position may also arise via 7...f3 8 gxf3 d6 9 Nd3. Note that with the f-file being closed in this line, 9 Nxf7 is no longer so powerful.

[9.Nf4 Be6]

9...c6 0.59/16 Alternatively:

[After 9...Be7 Walker stops, assessing the position as better for Black. Only in 1847, fifteen years later in a correspondence game between the cities of Philadelphia and Boston, did White improve with 10.Be3! Bxh4+ 11.Kd2

[Neither does 9...gxf3 0.35/18 9...Bf8-e7 -0.24 convince. After 10.Qxf3 Bg4 11.Qf2 c6 12.Bg5 Qd7 1.50/18 *(⌓12...Be7 0.87/19)* 13.Nc3 White enjoyed a commanding position in J.Wisker-J.Owen, Redcar 1866.

The text move, even though sensible in view of a possible plan of closing the a2-g8 diagonal with ...d6-d5, should be insufficient in the long run. With Black having returned the gambit pawn, White's lead in development simply cannot be ignored.]

Myers: This is Game #17 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes.Fraser #17; ILN 23/9/1893: 'Between Mr Fraser of Downfield and Mr Hart of Hull (says ILN)' **1.e4** Fraser #17; ILN 23/9/1893 Myers Fraser **1...e5 2.f4 exf4 3.Nc3 Qh4+ 4.Ke2 d5 5.Nxd5 Bg4+**

1.e4 Neil McDonald **1...e5 2.f4 d5**

QUESTION: The Dutch Defence is a pretty rare weapon at the world championship level, surely?

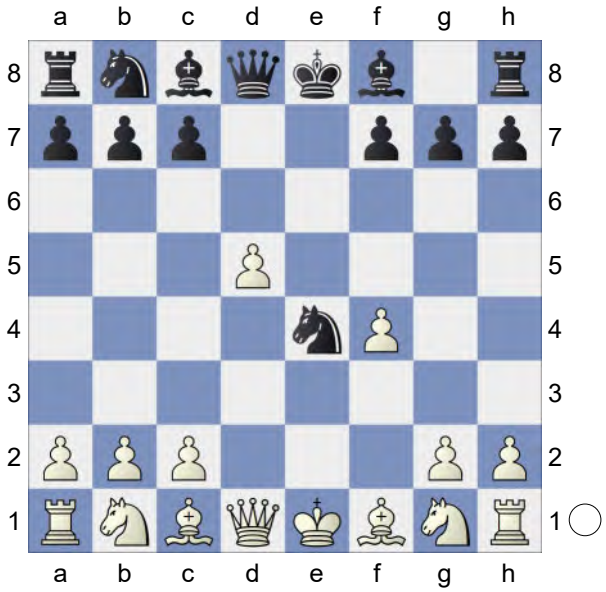
ANSWER: Yes, indeed, but Botvinnik was always fond of it, ever since his youth, and it featured extensively in this particular match against Bronstein, with both players using it. Botvinnik's choice of it in this game is doubly interesting, though, in view of the match situation. At this point, the match was all square at 10½-10½, with Bronstein having just won Game 21 as Black, to equalize. Under the rules of the day, Botvinnik needed only to draw the match 12-12, in order to retain his title, so one might have expected him to choose a more solid defence.

QUESTION: So why didn't he?

ANSWER: Paradoxically, I think he regarded the Dutch Stonewall as being solid. He had always had great faith in it, ever since his youth, and had used it against such titans as Capablanca, Keres and Reshevsky, without losing, so I think in his mind, it was as solid and reliable a line as any.

[2...exf4]

3.exd5 e4 4.d3 Nf6 5.dxe4 Nxe4



6.Nf3 This is a little unusual, but once again, psychological games are being played here. Botvinnik himself had played this move as White in the first game of the match, when Bronstein had chosen the Dutch. As the latter puts it in 'David Bronstein: Chess Improviser', "Botvinnik plays 'my' Dutch Defence and I play his system with 6 e3".

[6.Be3]

6...Bc5

[6...Be7]

[6...c6]

QUESTION: Why is that?

ANSWER: With White's knight on e2, I like the idea of getting a black pawn to e5 as soon as possible, so that the pawn 'dominates' the knight, stopping it

jumping to d4 or f4. On the other hand, it seems to me that the knight is quite well-placed on e2 against the Stonewall, as it can transfer to f4 and d3, eyeing up the key e5-square, and it also leaves the white f-pawn free to advance to f3, supporting the break e4. On the other hand, Botvinnik had forgotten more about the Dutch than I will ever know, and he had also played 6...d5 in Game 16 of the same match, so he clearly believed in it.

[8.g4 , a typical regrouping in such positions, and had achieved a satisfactory position. The game was eventually drawn after a gruelling fight, with Black close to a win in the endgame.

QUESTION: So why did he deviate now?

ANSWER: It is not clear. Possibly he feared an improvement, although it is not really the type of position where a strong novelty is likely – the position is about patient manoeuvring. The fact that Botvinnik deviates from a successful previous game says quite a lot about his character and objectivity, I suspect. Even when an opening had gone well for him, he would analyse the game closely and still look for improvements. The aforementioned game one had seen Bronstein prefer 8...0-0 here, and after the further moves 9.gxf5 Re8]

dispense with this exchange and to play the immediate 12.0-0-0 , with a continuation similar to the game. ANSWER: It is interesting, but Kasparov recommends instead a nice way of exploiting White's slight inaccuracy on the previous move: 12...Nxf4! .
QUESTION: Huh, that does not look terribly impressive or striking?

QUESTION: So how do you assess the position?
ANSWER: It is a typical Stonewall, where White has a slight advantage, perhaps, thanks to the weakness of e5, but where Black is very solid.
QUESTION: I thought the Stonewall was supposed to be bad, so how come White doesn't have the advantage?
ANSWER: I think the popular view of the Stonewall is just incorrect. The opening is not bad at all, but it does require careful handling and deep understanding. Unfortunately, there are many relatively weak players, who have used the line over the years, usually hoping they can simply give mate by ... Qe8-h5, etc. The trouble with such a one-dimensional approach is that it does not really work against decent white play, and there have been numerous games where Black has suffered a fiasco in such positions.
We have all seen many examples of nightmare bad Stonewall bishops, etc, and the opening has gained a bad reputation as a result. But when it is handled by a seriously strong GM, who knows what he is doing, the positions are perfectly playable and also highly interesting. For an excellent explanation of some of the fine points of the opening, I can recommend the section in the 2012 book, 'Study Chess with Matthew Sadler'.
11.Bxe7 Nxf4!? QUESTION: Wow! He is really going for it, isn't he?
ANSWER: Funnily enough, this is not quite the attacking gesture it looks. Black has a more subtle, positional idea in mind – he wants to play ...g4, so as to secure control of the e4-square and stop White organizing f3 and e4.
QUESTION: So is it any good? White is clearly better. **12.Ba3 Nd7**

[13...0-0-0!? 3.01/20 13...Bf5-e4 1.74 was also an option here, removing the strong white knight.

QUESTION: But then his dark squares look like a bad accident!

ANSWER: True, but it is not that easy for White to get at them, because his central pawns are fixed on dark squares.

QUESTION: So why didn't Botvinnik play this?

ANSWER: It is not clear. Bronstein says that he probably feared a later Bh4 (after 14.Rd4), but Kasparov suggests that Botvinnik may instead simply have thought he was holding the game position, and had no need to make this exchange. Bronstein criticized this as allowing White a favourable regrouping, and instead recommended 14...Ng6 .

QUESTION: Why is that better?

ANSWER: Well, Bronstein's idea was that White would either have to retreat the bishop to e1, interfering with the transfer of his rooks to the a-file, or "lose his important bishop".

QUESTION: But that looks rather a crummy bishop, so isn't White happy to trade it for the black knight?

ANSWER: Exactly! That is what Kasparov also says – he recommends Neil McDonald: '!' Neil McDonald: ', as after' *(14...Nh5 15.g4* , followed by Nd3 and Bf3 when Black still lacks counterplay.

QUESTION: A strange misjudgement by Bronstein, isn't it?

ANSWER: Well, maybe, but he probably thought that the white queen's bishop, although rather passive, is doing an important job of defending the pawns on e3 and b4 and that it would be missed after its exchange. There is some truth in that, and it is not clear how much advantage White really has, even in Kasparov's line.

One other factor is that Bronstein's attitude in his notes may have been influenced by what happens later in the game. As we will see, the supposedly bad queen's bishop plays a decisive role in the final attack. Even world class players can find it difficult to shake off such impressions.*)* Neil McDonald: 'Or if White presses ahead with' 15.g4 Neil McDonald: 'he can exchange off with']

EXERCISE: Can you find a good positional move after 16...Ne6 ?

Looking at the position, one can see that the white dark-squared bishop on e1 would really like to get into the game, so as to exploit Black's numerous dark-square weaknesses. 15.g3 0.51/21 **Bxh1±**

QUESTION: So how do you assess this position?

ANSWER: The computer likes White a lot, but I think his advantage is only relatively small, an assessment Kasparov confirms. White has weaknesses on e3 and e4, Black one on f5 and the draughtier king.

QUESTION: That is certainly radical! But is the cure worse than the disease?
ANSWER: It is one of the standard ways of meeting the minority attack, but is not always open to Black. Basically, for this to work, he needs to be able to prevent White from playing e4 (for a classic example of what can happen if he does not, see the final game of the Karpov-Spassky, Candidates Semi-final of 1974). Here, Black has a firm grip on e4 (at least, at the moment), so in principle, conditions ought to be right for ...b5. However, it is committal, and one of the other key aspects of successful application of such a structure, namely the ability to transfer a black knight to c4, is not present here. **21.Nd4↑** White has strong compensation. ANSWER: Black is holding the balance. His knight is now on a much better square than before, with the further possibility of coming to e4 and thence possibly to d6, always a good square for a black knight in these minority attack structures.

It was an easy to make such a misassessment as the black horse is sitting on an impressive outpost square in the centre, while the white bishop is doing nothing much at the moment except defending b4. Indeed, it looks as if it has been put on e1 solely to avoid getting in the way of the work of the 'more important' pieces down the a-file.

I think most of us would fall for Bronstein's positional trap. Only later do we see the role that the 'harmless' bishop on e1 is going to play in mating the black king.

Myers: This is Game #69 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.f4 exf4 3.Nc3 Qh4+ 4.Ke2 b6N**

Myers: This is Game #101 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF

was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.f4 exf4 3.Nf3 g5 4.h4 g4 5.Ne5 Nf6**

Myers: This is Game #69 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence,

with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.f4 exf4 3.Nc3 Qh4+ 4.Ke2 Qd8N**

Myers: This is Game #20 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF

was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.f4 Bc5 3.Nf3 d6 4.c3 Bg4 5.Be2 Nc6**

Myers: This is Game #92 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF

was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.f4 exf4 3.Nc3 Qh4+ 4.Ke2 Bc5?! 5.d4! Bb6**

Myers: This is Game #56 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo.

B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. C30: King's Gambit Declined
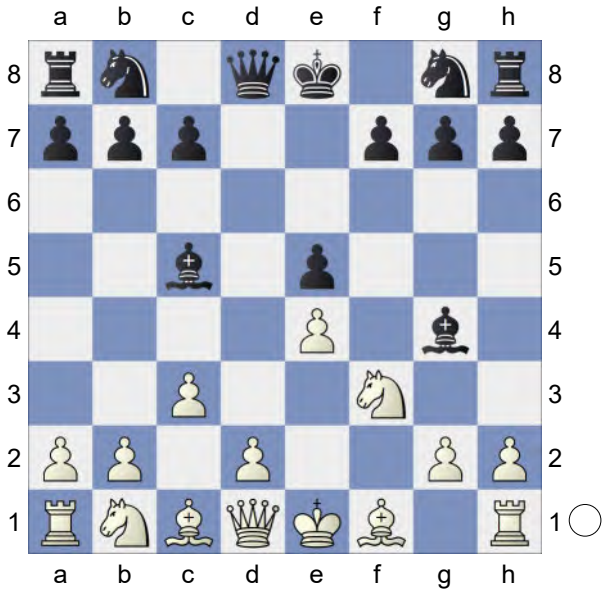
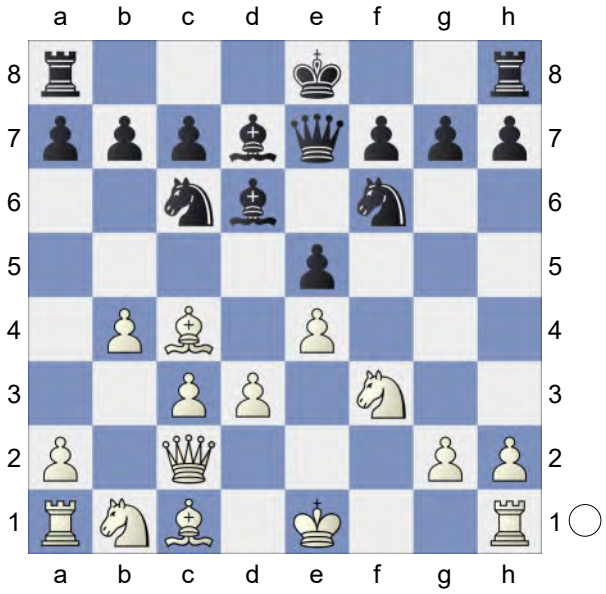
1.e4 e5 2.f4 Bc5 3.Nf3 d6 4.c3
The Sämisch variation, which although it has never been regarded as the strongest response to the Nimzo-Indian, is certainly the most direct and challenging one.
QUESTION: Why is that?
ANSWER: Because it directly challenges Black to implement his main idea of taking on c3 and doubling the white pawns. Effectively, White is announcing to his opponent that he believes the latter's entire strategic plan is faulty, and that the possession of the bishop-pair, plus the strengthened pawn centre, will more than outweigh the weakness of the doubled pawns. Readers of my companion volume 'Nimzowitsch: Move by Move' will be aware that the great

Nimzowitsch used frequently to take on c3, even without the provocation a2-a3, so great was his faith in the black position. Sämisch players are the other extreme, willing to spend a tempo forcing the very exchange that Black intends anyway.
QUESTION: And what is the truth about the variation?
ANSWER: It is probably not the best hope of any advantage. With accurate play, Black can neutralize the white threats and obtain a good game. But it remains a very viable weapon, and one which is very dangerous indeed against an unprepared opponent. **4...Bg4 5.fxe5 dxe5**



QUESTION: Is this best?
ANSWER: It is generally regarded as the best move, yes. Black immediately fixes the enemy doubled pawns and stakes a claim in the centre. However, other moves are possible. **6.Qa4+ Bd7 7.Qc2 Nc6 8.b4** The position is equal. **8...Bd6**
QUESTION: Why do you frown on this move?
ANSWER: It is not bad, but Bronstein himself noted at the time that there was no immediate need for Black to move his d-pawn yet.
9.Bc4 Nf6 QUESTION: What is that about? It looks a bit retrograde.
ANSWER: Actually, it is a standard idea in the Sämisch, and was first practiced by Capablanca, I believe. The point is to avoid the pin by Bg5, which would be quite nasty for Black – it would be hard to break, other than by playing ...h6 and ...g5, which with his king castled short, would be extremely risky. There is also another point to ...Ne8, although you would not know it from this game. More on that in a moment.
10.d3 Qe7



QUESTION: What is Black's idea now?
ANSWER: He is pursuing another standard plan in these positions. He intends to attack the weak pawn on c4, by means of ...Ba6 and ...Na5.
11.0-0 0-0-0?! 0.60/17 QUESTION: Why the punctuation? Isn't this standard?
ANSWER: It is the standard plan, yes, but I think Black should attend to matters on the kingside first.
[11...Nd8= 0.12/16 deserves

12.a4!± Immediately putting his finger on Black's error. Now there is a very unpleasant threat of the pawn pushing on to f6 in some variations, as well as a possible exchange on e6. Black is in trouble.

QUESTION: It seems odd that things should have turned against him so suddenly, with only a minor inaccuracy on his part.

ANSWER: To a considerable extent, that is the nature of the Sämisch. In such a sharp and doubled-edged variation, the cost of an error is always much greater than in a quiet position. White has some real trumps here, in the shape of his bishop-pair and powerful pawn centre. If he is allowed to exploit these, then Black's position can become critical very quickly. On the other hand, as several of the games in my Nimzowitsch book showed, the reverse is also true – White has some potentially quite serious defects in his position too, especially his doubled pawns, and if he plays too slowly and allows his opponent to block up the position, then things can turn bad for him very quickly, as well.

12...a5 13.b5! Nb8 QUESTION: Can't the pawn be taken? With the text, Najdorf was hoping to create counterplay on the open g-file, but he was always an incorrigible optimist, and no such play ever materializes. Instead, he is simply battered on the kingside.

14.Nbd2 Seizing the chance to relieve the pressure against d4 and drive the knight offside (on the previous move, 13 d5 would have allowed the knight to swing over to the kingside via e7).

Myers: Janis Vilkens (1910-2003) was a Latvian correspondence chess enthusiast who played in several "Deutsch Schachzeitung" tournaments. It seems probable that Vilkens met Keres through these DSZ events. However, I am not sure this is a real chess game at all but rather a kind of light-hearted joint chess composition. Take a look at moves 30-34 and then at Black's final move. There is altogether too much cooperation here for this to have been a real game. **1.e4** Heuer, Harding; R.Leininger Heuer, Harding; R.Leininger Myers Heuer **1...e5 2.f4 exf4 3.Nc3 Qh4+ 4.Ke2 Nc6 5.d4 d5**

This game from The Chess Player's Chronicle vol.6 1845 p125 originally escaped the attention of Pagni but it was in his 2004 Italian edition. First appeared in BLL May 11, 1845, described as Mr S. Angas of Durham, with a friend, against the Sunderland club. "A game by correspondence between the Sunderland Chess Club and two gentlemen of Durham, commenced some months ago, has just terminated in favour of the Durham amateurs. The following are the moves, with a few remarks by our esteemed contributor, Mr Angas, one of the winners."

Myers: This is Game #42 published in a book called "A Selection of 200 Games

of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. Myers: This is Game #37 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.f4 exf4 3.Bc4 f5 4.Qe2 Qh4+** Fraser #37: '?!' '?!' '?!' **5.Kd1 Be7?N**

(GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.f4 exf4 3.Nc3 c6 4.Nf3 d6?! 5.Bc4 Be6**

Just as at the time of Fischer's comeback in 1992 we wondered how strong his play was then, it is also just as unclear today at what point Fischer became the strongest player of his day - certainly before1971/72. Over the New Year period of 1963/64 Fischer again won the championship of the USA - with a score of 100%.
Huschenbeth,Niclas: 'This game was played in the third round of the U.S. championship 1963. Many argue that Fischer was at the peak of his strength during this time. This game and the tournament as a whole are definitely an argument for that statement. Fischer won the U.S. championship with a stunning 11/11, not conceding a single draw. This has never happened before and never been repeated since. Robert Eugene Byrne, playing with the white pieces, was one of the strongest American players at the time and also a participant in the candidates cycle later on. It adds to the incredibility that a player of such calibre loses to Fischer with White in just 21 moves. In the comments I have included Fischer's own account as written in his book "My 60 Memorable Games". Let's begin!
' So wie man bei Fischers Comeback 1992 rätselte, wie stark er da spielte, so unklar ist auch heute noch, ab wann Fischer der stärkste Spieler der damaligen Zeit war - gewiss nicht erst 1971/72. Zum Jahreswechsel 1963/64 gewann Fischer wieder einmal die USA-Meisterschaft - mit 100%.

Myers: This is Game #27 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.f4 Bc5 3.Nc3 d6 4.Nf3 Bg4 5.Be2?!**

Myers: Kashdan fails to give us a first name or initial for his opponent in this game, but he mentions that "Bentz" was

the captain of his high school chess team. We do find one "David Bentz" playing in the finals of the 14th Marshall Chess Club Championship in 1930-31; he finished in last place, but no matter. The time is about right, and the place is right. I'm going to guess that David Bentz is Isaac Kashdan's schoolmate and correspondence chess opponent. If genuuine, it is Kashdan's only known postal game.

Notably, the game is not to be found in the book "Isaac Kashdan, American Chess Grandmaster" by Peter P. Lahde (McFarland 2009). Lahde says nothing about Kashdan playing by post.

It would be good to verify the original source.

Myers: This is Game #13 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished

a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.f4 exf4 3.Nc3 Qh4+ 4.Ke2 g5! 5.Nf3? Qh5**

Myers: Andrei Andreyevich Markov was elected to the Russian Academy of Science in 1890 in recognition of his work in several areas of mathematics, including number theory, analysis, probability, stochastic preocesses, and Markov chains. He was also an active correspondence chess player who assisted and advised Mikhail Chigorin in his cable match with Steinitz in 1890-91.

Myers: The databases seem to have settled on the game-data as given here, agreeing with information published by TD Harding and others, but we should note that this does not correspond with what is written in Alekhine's "My Best Games of Chess". Alekhine writes in the English version of that book that this game is "played by correspondence in Russia, 1908-1909" and the black player is given as "W. de Jonkovski". According to Harding, "V Zhukovsky" is correct. Victor Charushin identifies Zhukovsky as a diplomat, serving as the Russian vice-consul in Adrianople, Turkey. Perhaps someone can discover a first name from non-chess sources, to complete our record. **1.e4** Myers Alekhine **1...e5 2.f4 exf4 3.Nf3 g5 4.h4 g4 5.Ne5 Nf6**

Myers: We learn from Tony Gillam that Mary Rudge (1845-1919) and her sister Emily Harriette Rudge (1839-1873) both played chess by correspondence. The family lived in Leominster, where Mary was born, until the death of their father, Dr Henry Rudge, in 1874. According to Gillam, the "Amateur Chess Magazine" ran from 1872-1874. Myers: This is Game #68 published in a book called "A Selection of 200 Games

of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. Myers: This is Game #28 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half-point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Fraser #28 Fraser #28 Myers Fraser **1...e5 2.f4 exf4 3.Nc3** Fraser #28: 'This gambit was played both R.B. and G.B.Fraser.' **3...Qh4+ 4.Ke2 d5 5.Nxd5 Bg4+**

Fraser: An amusing episode arose at this juncture. Instead of the obvious reply ...RB2, Black sent "...RKKt2", giving away his rook gratis. White captured it of course, but Black's indignation was so intense at this undignified action that he refused to be comforted. Any player of experience in Correspondence Play would have accepted the situation, and resigned with good grace. /// Myers: George, you will perhaps not be surprised to learn that after another 120 years of experience in Correspondence Play, neither technology nor civilization has been able to eliminate the clerical error or poor sportsmanship. Fraser #28: 'clerical error with consequences explained by Fraser in his book' **46.Rxg7**
